1.- ABSTRACT:

Cryptocurrencies are here to stay. Since the launch of Bitcoin in 2009 the market has not stopped growing and more and more people are interested in the crypto world. Financial and social crises are becoming more serious and more frequent in recent years, a fact that will undoubtedly lead to the creation of new ecosystems and economies based on cryptocurrencies.

2.- THE PROBLEM:

“If you are not a part of the solution, you are a part of the problem.”

Like Bitcoin, most PoW coins still require expensive mining equipment such as GPUs, ASICs FPGAs or powerful CPUs, also generating high energy costs and environmental heat that is beginning to be a serious problem for our planet. To achieve efficient mining you need a large investment in hardware equipment that will be difficult to make it profitable depending on your energy costs.

On the other hand, alternatives such as PoS, dPoS cryptocurrencies or similar variants have appeared in the market through Masternodes, etc. This type of cryptocurrencies are based on the concept of holding coins, usually requiring a lock period of the coins to receive rewards or demanding certain days of maturity through which you have to immobilize your funds, etc. These systems cause that sometimes high investments are needed again to assemble and maintain the Masternodes, they cause costs in servers, as well as that there are barriers to entry in terms of the amounts of coins and time necessary to perceive profitability. Again it becomes difficult to make profitable these investments, cause the ROI to become negative in most of the cases.

3.- THE SOLUTION:

xtake.cash is born as a global power mining platform for community based on the **XTK** token.

As a **XTK** tokenholder (AKA **xtaker**) you will receive a linear and constant return. The reward will not depend on complicated concepts such as difficulty, it will be easy to calculate and check out at all the times in real time.

It will not be necessary to have any knowledge of hardware or software to start earning money through cryptocurrency mining, nor will it be necessary to lock tokens or deposit them in wallets of which you do not have the private keys, neither you will need to invest in expensive hardware or pay for server maintenance.

“xtake.cash is not part of the problem, it’s part of the solution”

4.- UNIVERSAL BLOCKCHAIN INCOME:

More and more people and governments in the world are betting on establishing an UBI (Universal Basic Income) for humanity, this theoretical concept has limitations and drawbacks that could be improved through a transparent and unbreakable system, that is, through a blockchain. That is why at **xtake.cash** we want to launch the Universal Blockchain Income to the world

The journey and growth possibilities of the world of cryptocurrencies is enormous, currently they still represent a tiny percentage within the world economy, as cryptocurrencies are getting more and more adopted in our daily life, their value will increase exponentially.

xtake.cash seeks to transmit the wealth generated by cryptocurrencies through monthly transfers to its **xtakers**.

5.- HOW XTK WORKS?

Each **xtaker** will receive a payment on Day 1 of each month based on the mining power you have accumulated in the previous month. These payments will be received directly in the wallet of the **xtaker**. The status of each payment and the accumulated mining power will be searchable in real time through an individual dashboard on our website **xtake.cash**

XTK tokens have no maturity period and generate mining power and profitability from the first day they are in the wallet, the system automatically calculates the profitability of each investor in real time. **XTK** was initially born as an ERC20 token on the Ethereum network, it has been decided to use the ETH network because it is currently the most secure and robust network for the development of the initial phase of the project. As development progresses **XTK** will migrate to its own Mainnet

6.- XTK SPECS:

Blockchain:	Ethereum
Type:	erc20 utility token
Contract address:	0xF96459323030137703483B46fD59A71D712BF0aa
Symbol:	XTK
Decimals:	6
Max. Supply:	10.000.000.000 XTK

7.- XTAKER BENEFITS:

From the beginning of the stake period, daily rewards will begin to accumulate based on the rating of each **xtaker** according to the tokens it accumulates:

xtaker tokens needed	100.000 XTK
xtaker Silver tokens needed	500.000 XTK
xtaker Gold tokens needed	2.000.000 XTK

Monthly stable reward

xtaker	5,00%
xtaker Silver	10,00%
xtaker Gold	25,00%

Therefore, the monthly profitability of the **xtaker** ranges from 5% to 25%

Also, all you have to do to receive the rewards is to have an ETH wallet with **XTK** tokens. From **xtake.cash** we highly recommend the use of the Metamask wallet due to its ease of use and the integration possibilities for future projects that we will reveal over time.

Our system will automatically calculate your profitability daily based on the balance of the wallet, it will accumulate and on day 1 will also automatically transfer your benefits to your **XTK** address (address eth), so you will start receiving your monthly UBI (Universal Blockchain Income)

XTK will be negotiable on exchanges so you will always have the possibility to buy more tokens to increase your monthly UBI and your rating as **xtaker**, as well as sell them if you want to take profit of the token revaluation. **XTK** does not require maturity periods or token locking, so you will always be free to trade in the market.

It should be noted that the rewards system uses compound interest meaning that the return grows exponentially, let's see an example:

An **xtaker Gold** with 2.000.000 tokens will receive in the first month of reward the amount of 500.000 tokens and if it does not sell tokens in any exchange, it will continue to receive 25% per month on the accumulated balance.

Taking Bitcoin price data of about \$9.000 (May 2020) and **XTK** initial value of 5 satoshis, our **xtaker Gold** will have made an initial disbursement of about \$900 and if you hold the investment for 12 months the 2.000.000 tokens will have transformed into 29.103.830,46 tokens, which ceteris paribus will represent a portfolio value of USD \$13.096,72 which represents a return of 1.455,19% per year. This is more than a x14 on your initial investment after 1 year only with the monthly UBI that **XTK** will provide.

Starting from the second phase the **xtaker** rewards will be improved after the migration to the mainnet. Each **xtaker** will have the mining power equivalent to the % of circulating supply that their holdings represent, all the benefits of the **XTK** mining pools will be to distribute among the **xtakers** except for 5% of them in management costs and maintenance of the structure.

We have forecasts of great future profitability based on process optimization, economies of scale and global revaluation of the cryptocurrencies market. The future of **xtake.cash** is without a doubt bright, and solar energy will also shine in our ecosystem.

8.- THE XTAKER PRO AMBASSADORS:

During the main sale, the figure of the **xtaker PRO ambassador** will be enabled. The ambassador will be a sponsor of the **xtake.cash** project and will receive a commission for each new investor who joins the **xtake.cash** project with ref link during the main sale period.

The only requirement to be an ambassador is to have participated in the private or main sale and reach one of the minimum tiers:

xtaker PRO >= 100.000 XTK	5%
xtaker PRO Silver >= 500.000 XTK	10%
xtaker PRO Gold >= 2.000.000 XTK	20%

The **xtaker PRO** commission ranges from 5% to 20% of each new investment from referral links

Referral commissions accumulate to the daily reward generated by the **xtakers** and will be paid through the monthly UBI.

9.- THE STAKEUM ECOSYSTEM

xtake.cash is the first phase of the development of an ecosystem that will be called **STAKEUM**. This ecosystem will have various sources of wealth generation through cryptocurrencies. As the phases progress we will have stake pools, masternodes and ecological PoW mining rigs. At **xtake.cash** the **xtaker** will always be the owner of its tokens, the fact of being an **xtaker** will allow you to receive rewards from the first day without the need to lock tokens or transfer them to external wallets, and also you can trade your tokens in the market without any limitation.

This is the beginning of a great project that will be developed according to our Road Map

10.- ROAD MAP:

10.- DISCLAIMER:

XTK is an utility token, make sure that your origin legislation is not contrary to the use and trade of cryptocurrencies.
